Substantial improvement of Key Operational and Financial Performance Indicators in 2Q and 1H 2013

- 96 mln tons (706.0 mln boe) – hydrocarbons production by combined company (organic growth by 0.4%)*, organic growth of Rosneft by 2%***

- 0.53 mln tons per day – production of liquid hydrocarbons, growth by 1%

- 106.2 mln bcm per day – gas production, growth by 27%

- 47 mln tons – crude oil processing of incorporated company, growth by 2%

- Stabilisation of brownfield production

- 58.8 th. tons per day – record production level reached at Vankor in 2Q13

- 1,988 RUB bln – revenue, growth by 34.0%, organic revenue growth - 35 RUB bln, 2.4%*

- 371 RUB bln – EBITDA growth of 36.4%, organic EBITDA growth – 5 RUB bln, 1.8%*

- 68 RUB bln – adjusted free cash flow**; 118 RUB bln FCF organic growth compared to the first half of 2012

- 137 RUB bln – net income, growth by 18.1%

* Compared to the first half of 2012 in accordance with combined proforma of Rosneft and TNK-BP. Hydrocarbon production doesn’t include affiliates.

** Adjusted for the prepayments received under long-term oil supply contracts in the amount of 258 RUB bln including 26 RUB bln in 2013

*** Rosneft stand alone basis
Key events

- A number of agreements for priority business development areas signed at the St. Petersburg Economic Forum including:
  - Seven agreements with ExxonMobil for offshore hydrocarbon production development
  - Agreements with Statoil for development of four offshore hydrocarbon production projects in Russia
  - Agreements with Eni on development of three offshore hydrocarbon production projects in Russian
  - Strategic Cooperation Agreement with GE on technology and applied research

- Gas business development
  - Acquisition of OOO NGK Itera gas assets on competitive terms in July 2013
  - Agreement with ExxonMobil on the project development for LNG plant construction in the Far East and agreement with Sakhalin Region on land plot allocation for plant construction
  - Heads of agreements on LNG supplies with SODECO, Marubeni and Vitol

- Development of tight reserves – agreements with Statoil and ExxonMobil

- 15 new licenses for Russian offshore areas with 16.7 bn toe of recoverable resources

- Acquisition of a 30% stake in 20 deepwater blocks of ExxonMobil in the Gulf of Mexico for exploration

- Venezuela parliament ratified an agreement between Rosneft and PDVSA on the beginning of a joint project for the production of hydrocarbons Carabobo-2 (resources c. 1.3 bln boe)

- Large-scale agreements on long-term oil supply with China National Petroleum Corporation, PKN Orlen, Trafigura on advance payment basis
Assessment of synergy effect

Exploration and Production

- **56 RUB bln** - development of Suzun, Tagul and Lodochnoye fields using Vankor field's infrastructure

- **19.6 RUB bln** - optimization of costs and asset management:
  - search and exploration of hydrocarbons in Irkutsk region based on Verkhnechonskoye field
  - establishment of a single office in Venezuela

- **6.4 RUB bln** – better efficiency of oilfield services – improvement of existing contractual terms

Refining, Trading and Logistics

- **Over 5 RUB bln** – reducing transportation costs through creation of common oil distribution balance

- **3.8 RUB bln** – geographic swap deals on the existing flows of light products between the oil product supply ventures

- **Over 1.9 RUB bln** – logistics cost saving effect from reduction of railway oil transportation tariffs

The overall synergy effect is estimated at 400 billion RUB of discounted cashflow

Note: estimated NPV of synergistic effects, the effect was calculated for the planning period of 2013 to 2030, the exchange rate of 33 RUB/$1 US
Positive operational effect and optimization of costs

19 bln RUB - expected synergy effect from assets integration in 2013

- Revising technical solutions and management approaches:
  - Using common electric power capacities and infrastructure at Yamal
  - Optimizing management structure of JV in Venezuela

- Applying standard contract terms to maximize Company’s benefits
  - Export contracts & early payments unification
  - Improvement of contracts terms
  - Contract fees standardization
  - Central procurement

- Improving logistics:
  - Redirecting resources to high-yield export routes
  - Optimizing crude oil and petroleum products allocation
  - Implementing single crude oil balance

### Structure of synergies by main business area in 2013 (estimate)

Note: Estimates based on oil price of $100 US/bbl and the exchange rate of 32 RUB./$1 US
*Operational efficiency includes cost, revenue and logistics optimization
Capital Expenditures control

Priorities of CAPEX program:

- maintaining production at brownfields
- increasing production at greenfields
- refinery modernization

Seasonal increase in E&P CAPEX 2H vs 1H

2013 CAPEX growth and shift to 2H due to integration process

Note: (1) Rosneft excluding TNK-BP
Control over G&A & Transportation Expenses

**Transportation costs**

- Organic reduction due to effective cost control
- One-off commissions on advances from Glencore and Vitol, legal and consulting fees related to integration process

Note: (1) Proforma data for 2012, consolidated data for 2013.
Stabilizing production on brownfields and developing tight oil with advanced technology

- 3,421 kb/d - stabilizing production at mature fields
- Yuganskneftegaz and Samotlorneftegaz - over 40% of the United Company production (>1.7 mln b/d)

Efficient technology application across the united Company asset base
- Horizontal wells with multi-stage hydrofracturing
- Waterflood management (FPM, water inflow control)
- Localization of residual reserves, sidetracking

 Tight oil reserves – priority in reserve development and enhanced oil recovery
- Pilot projects at Northern Khokryakovskoye and Yem-Yegovskoye fields – stable trends
  - Northern Khokhryakovskoye field - 3 wells; average oil flow rate – 690 b/d per well
  - Yem-Yegovskoye field - 2 wells; average oil flow rate – 409 b/d per well
  - Testing production technologies to develop the Bazhenov formation, including the testing of well completion techniques never employed in Russia before
Medium-term production growth through acceleration of greenfield development

**Greenfield contribution – 18.4% of the total production volume; stable growth rates**
- Vankor - 433 kb/d, production growth by 2.5% through continued efficient drilling program; optimization of well operation modes
- Verkhnechonskoye - 155 kb/d, production growth by 1.8% through development of infrastructure; optimization of well operation modes
- Uvat - 176 kb/d, production growth by 12.2% through integration of Tyamkinsky Hub into operation

**Accelerated commissioning of Suzun, Tagul and Russkoye fields – advantages of the united Company**
- Oil transportation via Vankor - Purpe pipeline
- Construction of the common GTPS at Vankor Field
- Use of Vankor winter roads – optimization of logistics
- Centralized development and operation of fields based on ZAO Vankorneft

*Comparison of Q2 2013 with Q1 2013*
Unique opportunities for growth and value creation of the largest offshore project portfolio

- **Sea of Okhotsk, Sakhalin-1:**
  - Participants: ExxonMobil, Rosneft, SODECO, ONGC
  - Reserves:
    - Oil: 218 mln t
    - Gas: 465 bcm

- **Kara Sea:**
  - Partner: ExxonMobil
  - Recoverable resources:
    - Oil: c.5 bln t
    - Gas: c.8 trln cm

- **Sea of Okhotsk:**
  - 6 LBs, partners: SINOPEC, Statoil, INPEX
  - Recoverable resources:
    - Oil: c.2 bln t
    - Gas: c.2 trln cm

- **Kara Sea, Laptev Sea, Chukchee Sea:**
  - 7 LBs
  - Partner: ExxonMobil
  - Recoverable resources:
    - Oil: c.7 bln t
    - Gas: c.6 trln cm

- **Black Sea:**
  - 2 LBs
  - Partners: ExxonMobil, ENI
  - Recoverable resources:
    - Oil: c.3 bln t

- **Barents Sea:**
  - 3 LBs*, partners: Statoil, Eni
  - Recoverable resources:
    - Oil: c.2 bln t
    - Gas: c.2 trln cm

- **Gulf of Mexico:**
  - 20 LBs, partner: ExxonMobil
  - Recoverable resources:
    - Oil: 46 mln t

**46 licenses for offshore areas with aggregated recoverable resources** of 42 bln toe, of them:

- **15 new licenses acquired in H1 for offshore areas in the Barents, Kara, Chukotka, Azov Seas and Laptev Sea** (16.7 bln toe of recoverable resources)

* LB – License Block
**Amount of resources is stated based on current estimation
Accelerating offshore exploration activity

- Over USD 250 mln – repayment of one-off license fees and portion of historical costs in 2Q 2013
- Creating an Arctic research center with ExxonMobil (Rosneft 66.67%, ExxonMobil 33.33%)
- Arctic:
  - Barents Sea. 2D Seismic (15% of the plan) on Fedynskiy and Central-Barentsovskiy licensee areas (LA). In partnership with Eni
  - Pechora Sea. 3D Seismic (55% of the plan) on the Yuzhno-Russky License block (LB)
- Far East: Sea of Okhotsk
  - >2,500 running km – accelerated 2D seismic acquisition on Lisynskiy, Kashevarovskiy, Magadan-1 LBs. In partnership with Statoil
  - Equipment audit and mobilization of the 2D seismic vessel on Magadan-2 and Magadan-3 LBs. In partnership with Inpex
- Krasnodar Region: Black Sea
  - Geological engineering survey on 357 sq.km of deep sea areas of the Tuapse trough LB. In partnership with ExxonMobil
Steady gas production growth, world class resource base and effective monetization

- Acquisition of OOO NGK Itera gas assets
  - competitive terms of acquisition – 1.57 USD/boe
  - synergy of gas supply by replacing gas purchased from Itera with own gas of Rosneft
- 69% of gas produced in 2Q 2013 sold to end consumers
- Monetizing future production – long-term gas sale contracts totaling 72 bcm per year
- Heads of Terms with ExxonMobil on studying prospects for an LNG plant with capacity of 5 mln t per annum and start of operations in 2018-2019
- The Agreement on key terms of LNG sales with Marubeni Co., Vitol and Sodeco for a total of 5 mln tons per year

Rosneft offshore gas resources are estimated at c. 24 trln cm

* Data includes TNK-BP and 100% Itera gas sales and consumption for the respective periods for organic growth calculation purposes
Growth in oil refining against successful implementation of the modernization program

- **20.6 mln tons** – Russian oil refining in 2Q 2013; 8% growth yoy vs. 4.2% overall Russian growth

- Russian oil refining – the most profitable way to monetize crude; average refining margin in 2Q 2013 – RUB 1200 per ton

- Meeting the schedule of the Russian refineries upgrade program:
  - Saratov refinery - Commissioning the Isomerization unit – full transition to Euro-5 gasoline production
  - Angarsk petrochemical company – 2 reactors for a diesel hydrotreating unit installed
  - Achinsk refinery – 4 hydrocracker reactors on the way to the refinery via the North Sea route

- **5.9 RUB bln** in 2Q 2013 – economic effect of the rapid switch to production of Euro-4 and Euro-5 motor oils at the Company's refineries
Substantial increase in petroleum products sales efficiency

- Rapid growth in daily sales by gas stations and increase in retail sales profitability
- Steadily increasing direct sales of jet fuel ("direct aircraft fueling") - 69% in 2Q 2013, 4% growth by 1Q 2013
  - Acquisition of fuelling complexes network of OOO BATO in Anapa, Gelendzhik, Sochi, Krasnodar, Krasnoyarsks, Abakan
  - Leasing fuelling installations at the airports of Nizhnevartovsk, Nyagan', Noviy Urengoi
- Expanding bunkering operations in the Far East
Crude Oil & Petroleum Products Sales of Rosneft

- Crude oil production growth
- Redirection of crude oil flows from domestic market to export
- Increase in share of sales to Asia
- Increase in crude oil refining and petroleum product output
- Redirection of petroleum product flows from domestic market to export
- Crude oil sales reduction and increase in petroleum product output and sales
Increasing sales via priority export routes

- Long term agreements with CNPC to sell crude under an Intergovernmental agreement between Russia and China on a prepaid basis.
- A long term agreement with PKN Orlen to sell 6 million tons of crude to Czech Republic over 3 years via a high margin route.
- Long term export contracts obligations:
  - Secure own production covering the needs of the domestic market
  - Available transportation capacity
  - Market based pricing

Note: (1) Including interest accrued on loans and borrowings, promissory notes payable, RUB bonds and eurobonds (2) Capitalized interests are estimated in accordance with IAS 23 ‘Borrowing Costs’. The capitalization rate is calculated by dividing interest expenses on loans related to capital expenditures by the average balance of these loans. Interests capitalized are calculated by multiplying the average balance of construction in progress by the capitalization rate.
